

In Silico Determination of Methylated Residues in Mammalian Proteins

Filesize: 8.81 MB

Reviews

This sort of ebook is every thing and made me hunting forward and a lot more. I have read through and i also am confident that i am going to going to go through once again once more in the foreseeable future. I discovered this publication from my dad and i encouraged this book to discover.

IN SILICO DETERMINATION OF METHYLATED RESIDUES IN MAMMALIAN PROTEINS

LAP Lambert Academic Publishing Mai 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Bioinformatics is a helpful tool to experimental studies. It is less time consuming and may provide a platform for experimental work. Post translational modification is investigated in silico, with the help of the bioinformatics tool MAPRes. This tool mines association pattern around a modified residue. In this work association rules were mined around methylated Lys/Arg residues in protein. These rules show highest preference for Gly in modified protein Arg and Ser and Gln in modified protein Lys. 75% data support the preference of Gly in methylated Arg with 100% confidence level. 25% data support the preference of Ser and Gln in methylated Lys with 100% confidence level. The comparison of MAPRes analysis results for predicted Lys and predicted Arg substrate sites with those of MeMo, MASA and BPB-MMS prediction methods show a high conformity level, ranging from 13% to 72%. This high rate of conformity points to the accuracy of the algorithm and the technique of data mining applied in MAPRes. This work will be helpful for determining methyltransferases sequence specificity in protein which will be helpful in disease such as cancer, diabetes, spinal muscular atrophy etc. 88 pp. Englisch.
