Using a Zambian Case study, the research was undertaken to determine why many Non-Governmental Organizations implementing HIV and AIDS projects in Zambia were experiencing project failure and as a result, there were deficiencies of services to the intended beneficiaries. The generally accepted public reason for the high rate of project failure is noncompliance to donor requirements. Key stakeholders were able to come to this conclusion after the results of an independent audit conducted in 2009 by the global fund. The scope of the research was confined to projects administered and supervised by One NGO that to more than 300 NGOs covering the period 2003 to 2009. The main aim of this study was to research in to the reasons why there was a high rate of project failure in projects funded and supervised by XYZ. To achieve this aim, two hypotheses were set in line with the generally accepted reason of project failure: To test the hypothesis that The major cause of project failure is none compliance to donor...
