Excerpt: . . . 11 city using this new technology to reduce the generation of mercury amalgams going into the sewer system, highly effective. The other point we would make is that when you go into the sewer systems themselves, if you look at sewage sludge, EPA 503 standards apply to land application. We have standards that limit the amount of mercury that can go into land-applied sludge, and we also have air emission standards that limit the amount of mer-cury that can be emitted from incineration. One particular item that may be of interest to the committee is that in 2006, this past year, EPA has undertaken a study of certain portions of the health services industry. One part of that are dental offices and the discharge of amalgams with mercury from dental of-fices, and we will be completing that study probably in the fall of 2008. We expect that information will give us a lot of valuable data on the volumes and the kinds of BMPs...
