PRINCIPLE OF ELEMENTARY MECHANICS (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .eccentricity of the ellipse, they will be in equilibrium for all positions of W on the curve; and if they have any other ratio they will not be in equilibrium at any point, except at the extremities of the axis, A and B . In Conic Sections the proportion involving e , given in this article, may not be given in this form. If a be the semi-major axis, and x the abscissa of the point c in reference to the centre, then the following equations are usually given, viz. the radius vector, de , $= -a ex$; the distance from the focus to the foot of the normal, de , $= e(a ex)$; the plus sign being used for the distance $e d$, and the minus sign for ed . These values readily give $de - e(a ex) - de a ex$ hence, the proportion given in the text. 262. Let the curve be an hyperbola, the pin being in the upper focus. Proceeding as before, we find W but in this case e exceeds unity; hence W must exceed P , while in the former case W must be less than P . 063. Suppose, in the preceding case, that the pin over which the string passes is at the centre of the hyperbola. Let a be the semi-major axis, b the semi-minor axis, the axis of x horizontal, and y vertical. The axis of the hyperbola being vertical, the equation will be $a^2 - by = -aW$. (1) Construct the triangle of forces cab , in which ah will be...
