The Parallel Postulate, the Special Problems and Relativity

By Markos Georgallides

LAP Lambert Academic Publishing Okt 2015, 2015.

Taschenbuch. Book Condition: Neu. 220x150x8 mm. Neuware -

Because of Geometers scarcity, I was instigated to republish

this article and to locate the weakness of proving this Axiom.

Weakness created the Non-Euclid geometries which deviated

GR in Space-time confinement, so, not conceiving the beyond

Planck`s existence, not explaining the WHY speed of light is

constant, and thus the whole universe. In the manuscript it is

proved that parallel postulate is only in Plane (three points only

and not a Spherical triangle) based on the four Postulates for

Constructions, and now is proved to be a Theorem, where all

properties of Euclidean geometry compactly exist as the

Extrema Quantization. Projective, Hyperbolic and Elliptic

geometry is proved to be an Extreme in Euclidean geometry

where on them Einstein's theory of general relativity is

implicated approximately to the properties of physical space.

The universally outstanding denial perception that Proof by

geometric logic only is inaccessible, is now contradicted.

Furthermore consists the first order of conceiving the

Geometric logic and knowledge, for the relative extended

Physical world as in criticism. 140 pp. Englisch.
